CABIN FLOOD LIGHT

WHITE LED FLOOD LIGHT

Benefits

- Low Power Consumption
- LED Technology
- NVIS White Light
- Robust Design
- High Reliability
- Low Cost of Ownership

Details

The white LED cabin floodlight was developed for use in transport aircraft to provide area illumination.

The unit is mounted horizontally, projecting downwards a high intensity broad beam of NVIS white light.. The light is continuously dimmable down to 10% of the maximum output.

Designed to provide a brightness of 250 lux at a distance of 2 metres.

The operating voltage range is 18 to 32V DC and the connector is a D38999 type.

The light is qualified in accordance with RTCA/DO160G.

Subject to change without notice. Any liability for errors and omissions is excluded.
